

# Improvements Coming Soon

Transmission line upgrades in your area will enhance reliability and strengthen the power grid, allowing us to serve homes and businesses well into the future.

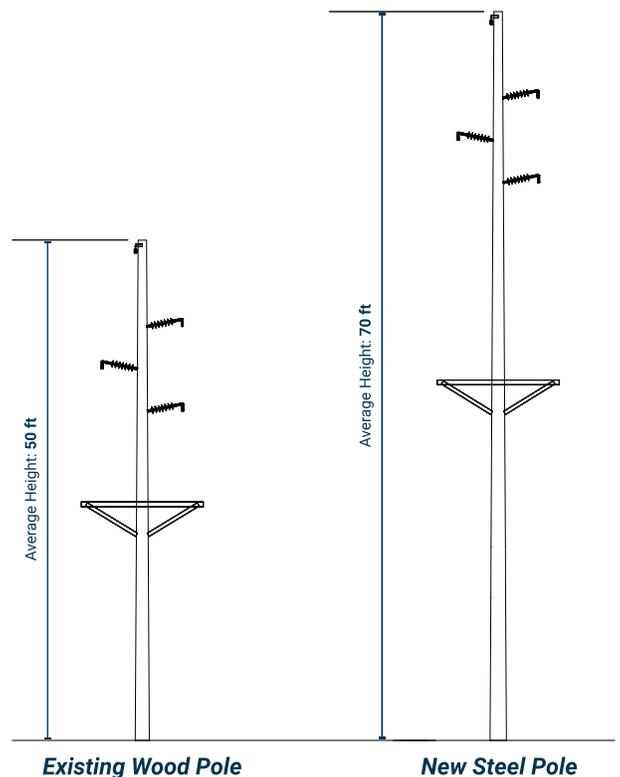

Construction is scheduled to begin **JUNE 2024** and be completed **DECEMBER 2024**.

## TRANSMISSION PROJECT MAP

## EXISTING WOOD POLE TO NEW STEEL POLE

Property restoration will take place after construction is complete. Duration of restoration is weather dependent and varies by project, but properties will be restored to, near as reasonable, pre-construction condition.

Steel poles are utilized for reliability and resiliency with the harsh weather conditions our communities can face.
